WPCC™ H&S Solutions for Every Canadian Workplace

Building an effective OH&S program requires a clear vision, a dedicated plan, and the right tools. We have applied that same approach to engineering our comprehensive **WPCC™ H&S solution and Document Management system**, each designed with embedded intelligence, our **Personal Compliance Assistant (PCA)**, to guide your compliance.

Forged by nearly 25 years of continuous evolution in Canadian workplaces, our H&S solutions were born from a simple truth: a one-size-fits-all approach is not the solution. We understood that to genuinely help clients with the critical challenge of H&S posting and document management, we needed to create a system that was both flexible and unwavering in its commitment to the law.

The professional presentation and meticulous design of our solutions save countless hours and resources that a "voluntold" individual could never accomplish alone.

From our all-in-one Signature H&S Communications board system to our flexible FVP H&S Posting Decal package solution, each of our four solutions is part of the same legislatively-backed system. They are all designed to meet a specific need and budget, ensuring no workplace is left behind.

All **WPCC™** H&S solutions come with our unique Implementation Guide — your roadmap that guides you through the setup, ensuring your compliance efforts are never compromised.

Explore our collection below to find the perfect fit for your organization.

Implementation Guide

WPCC™ Health and Safety Board Implementation Guide
Includes our Personal Compliance Assistant (PCA). This comprehensive guide is your blueprint for creating a clear, accessible, and well-organized safety communication system. It provides detailed instructions on everything from proper board placement to managing its various communication modules.

Description:

The **Satellite H&S Information** solution is a high-end, single-board solution (38" x 48") designed to work in concert with our **Signature** system. The **Satellite** board becomes a high-end supplementary board for secondary locations. It is the perfect way to extend your H&S coverage to other floors or specific work areas, ensuring all employees have easy access to essential information without needing a full-sized setup.

This solution is an example of our agile-driven philosophy of continuous innovation, developed to meet the needs of clients who want a robust, high-end board with a more streamlined presentation. By condensing the content of the two-board **Signature** system into a single board, we doubled up certain modules and completely removed one. As a result, the **Satellite** board is not as robust as the **Signature** board in its presentation, but it still provides a comprehensive compliance solution that is a vital part of your H&S ecosystem. Your company logo is also included on the **Satellite** board to reinforce ownership. This professional and organized system saves countless hours of administrative time and research.

WPCC™ SINCE 2001

WPCC™ FVP Notice Board
Bilingual Health & Safety Notice Board System (2-part board system).
— the ultimate posting and document management companion for all your mandatory Health & Safety Documentation.

NOTE: Shown with client logo only. No client information or documentation has yet populated the board.

This system was born from our commitment to ensuring no workplace is left behind. It provides a professional, and organized platform for all your required health and safety notices. Although it is our entry-level board, it is built on the same legislative foundation as our Signature system, but with different hardware. It is an essential component of your H&S ecosystem that ensures you have a complete solution for compliance without the premium cost. This organized system saves countless hours of administrative time and research. Your company logo is also included on the FVP Notice board to reinforce ownership.

The complete system includes:
- **The FVP H&S Notice board:** A single-board (48" x 48") with the same legislatively-backed information as our premium boards, but with different hardware.
- **The Implementation Guide:** A roadmap that provides step-by-step guidance right out of the box.
- **The FVP Due Diligence Planner board:** (15" x 48") that complements the main board. This board and its documentation are designated for the exclusive use of H&S committee members.
- **The FVP Document CUBE:** Houses 4 binders for all your safety records. This component is also for the exclusive use of H&S committee members.

**WPCC**™ FVP Due Diligence Planner Board Included

By streamlining your documentation management, the **WPCC**™ FVP Document CUBE ensures that your records are easily stored and accessible, which is crucial in the event of a legal investigation or audit.

WPCC™ **Health and Safety Board Implementation Guide**
Includes our Personal Compliance Assistant (PCA). This comprehensive guide is your blueprint for creating a clear, accessible, and well-organized safety communication system. It provides detailed instructions on everything from proper board placement to managing its various communication modules.

Description:
With our comprehensive **WPCC**™ FVP Build Your Own H&S Posting Decal solution, whether your organization has five or 5000 employees, systematically and effortlessly transform any workplace cork or bulletin board into an organized and recognizable Health & Safety Posting board. Our turn-key solution is built on Canadian OH&S legislation and signage communication theory.

It's Easy to Do … Scissors not required … Just Peel and Stick in Place!

Elevate your workplace's health and safety posting and communication with our customizable solution. Introducing the **WPCC**™ FVP Build Your Own Bilingual H&S Posting Board Decal Solution – it empowers those in charge of posting all vital and mandatory H&S information with the ability to refresh, organize and transform their existing cork or bulletin boards, whatever the size, into easily identifiable H&S communication tools throughout the workplace.

With the **WPCC**™ FVP H&S Posting Board Decal Solution, you have the flexibility to organize and address all vital, relevant and mandatory H&S posting requirements exactly the way you want, tailored to your specific needs. The bilingual format document title headings help you meet legislative posting requirements, demonstrating your commitment to addressing and adhering to the latest workplace safety standards.

User-friendly, so anyone can do it!

WPCC™ Health and Safety Board Decal Implementation Guide
Implementation Guide

Your Decal Package includes our Personal Compliance System (PCS) Decal Implementation Guide, a comprehensive, step-by-step resource designed to help you transform a cluttered cork or bulletin board into a professional, well-organized communication hub.

This guide is your personal blueprint for organizing and applying the decals onto an existing cork or bulletin board in your workplace. While it requires dedicated effort, the result is a polished, compliant H&S system with proper industry title headings to identify your documentation, looking infinitely better than a board that was simply thrown together. By building it yourself, you create a perfectly tailored, central health and safety posting board that is specific to your workplace's unique requirements.

Due Diligence in Action: The Planner Board and Document CUBE

The Due Diligence Planner Board and the Document CUBE are the essential components that transform your visible communication efforts into undeniable legal proof. They are the practical manifestation of your commitment to the Internal Responsibility System (IRS).

## The Due Diligence Planner Board: Your H&S Command Center

The **WPCC**™ Due Diligence Board Planner is designed specifically for the individuals who hold the highest level of accountability for maintaining the integrity of the safety program, including the Owner of the Corporation, Directors, Officers, Senior Management, and Health and Safety Committee members. This board is not for general viewing; it is a dedicated workspace that gives your team a clear, focused structure for their vital tasks.

- **Purpose-Built:** This smaller board (15" x 48") complements your main H&S communications board but serves as a private, exclusive H&S command center for internal records.

- **Proof of Action:** It provides a systematic structure for committee members to track essential duties, ensuring that tasks like posting updates, scheduled inspections, and reviewing procedures are handled on time.

- **The Working Tool:** It's a non-public workspace, making it a functional tool for record-keeping and planning that respects the privacy and workflow of the organization and H&S Committee.

The Document CUBE: Centralized Legal Proof

The Document CUBE is the secure and organized depository for your most critical records. It solves the problem of decentralized, scattered documentation that can never be found when needed.

- **Ultimate Depository:** The CUBE centralizes all your hard-copy documentation that is not mandated for public posting.

- **Organized for Defence:** The CUBE systems (Signature, Satellite, and FVP) store colour-coded binders with numerous tabs—all designed to align with legislative requirements. This eliminates chaos and misfiling.

- **The Lawyer's Tool:** As the definitive hard-copy evidence of your commitment, the Document CUBE is the single most important resource in the event of an incident or Ministry of Labour inspection. It allows your organization to quickly retrieve the necessary documentation to prove that you took "every reasonable precaution," transforming years of effort into a legally defensible truth.
